CarMD® Consumer Automotive Device and Software System Now For Apple's Macintosh OS X Snow Leopard Platform

CarMD.com to Exhibit at Macworld Expo San Francisco, February 11-13, 2010

FOUNTAIN VALLEY, Calif. – (updated Jan. 15, 2010) – CarMD.com Corporation is pleased to announce its CarMD® Handheld Tester & Mac/PC Software System is now confirmed to support Apple® Macintosh OS X Snow Leopard. CarMD.com Corp., which debuted the dual-platform Mac/PC version of its award-winning consumer automotive diagnostic tool this past October, will demonstrate the latest version of its product and website as a first-time exhibitor at MacWorld Expo (Booth #766), in San Francisco February 11-13, 2010.

“CarMD is committed to offering drivers the latest in vehicle and computer coverage, which is why our software engineers and programmers made it a priority to develop an updated version as soon as Snow Leopard was available,” said Richard Amador, director of marketing for CarMD.com Corp. “We look forward to introducing our solutions-based product to the growing Apple Mac community, which includes many of our current customers and our employees who have made the switch to Mac as their primary desktop and notebook platforms.”

Every CarMD® 2100 Handheld Device & Software System sold after October 17, 2009, features CarMD's Runtime Software Version 3.0.3, which is compatible with Apple® Mac OS X version 10.4.4 to version 10.5.x (for both, Power PC- and Intel-based Macintosh systems). Customers who recently upgraded or purchased a Mac with version 10.6.x (Snow Leopard) are encouraged to download the new CarMD Runtime Version 3.0.4 by visiting <http://www.carmd.com/33.4/Article/SystemRequirements>. This new release has been stringently tested by our software engineering team to run reliably on all Snow Leopard Macintosh operating systems. CarMD will also continue to run on the following Windows® based systems: Windows 2000, Windows XP, Windows Vista® and the new Windows 7 operating system.

The CarMD® handheld device and software system works on all 1996 and newer OBD2 cars, light trucks, SUVs and minivans manufactured for use in the U.S. – foreign and domestic. The easy-to-use tester can be used by the average driver to quick check an unlimited number of vehicles. Within seconds, its Vehicle Health Monitor™ LEDs (green, yellow, red) tell the driver if the vehicle's systems are running normally, which is beneficial when to catch hidden problems before they become expensive repairs, inspect used cars, and determine if the vehicle will pass its emissions test. When a problem is found, CarMD customers gain access to an unprecedented diagnostic database using the included software, their computer and own Internet connection, to generate a report with probable cause, estimated repair costs, vehicle recalls and more.

About CarMD.com Corp.

The mission of Fountain Valley, Calif.-based CarMD.com Corp., is to empower consumers by providing the tools and information needed to make better-educated decisions about their vehicle's health and maintenance. Distributed by CarMD.com Corp., CarMD costs \$98.99 and is available in the U.S. direct to consumers via two convenient options: 1) toll-free phone: 888.MyCarMD (888-692-2763), or 2) online at www.CarMD.com. The product is supported Monday – Saturday from 6 a.m. to 6 p.m (PST) by ASE Certified Technicians based in the U.S.A. For more information, visit www.CarMD.com or see us at 2010 MacWorld Expo Booth #478.
